

Vertical Racks

Our vertical dumbbell racks are the optimal space-savers! We have an assortment of styles to choose from. The small footprints make them ideal for use in limited-space environments. We offer 2-sided and 4-sided designs, as well as our unique five-pair Twin Tower rack (V-TT-5). Depending upon your special needs and budget, there's a good chance that we have a rack for you. Exact measurements are available on our web-site, our digital brochure and this tech sheet. All racks can be custom-painted to match any color scheme; just ask your local representative.
