PRECOR

HIGHLIGHTS

CrossRamp® Technology

Precor CrossRamp technology adjusts the shape of the elliptical path your feet travel so you can target specific muscles or all major lower body muscle groups.

Proper Biomechanics and Variable Stride Geometry™

Our patented elliptical path perfectly mimics a natural running stride allowing exercisers to keep their heels down through all ranges of motion for a more comfortable, effective and ergonomically correct workout.

Preset Workouts

25 preset workouts help you tailor your exercise to your fitness goals and stay challenged. Built-in Work Out Accelerators suggest ways to get more out of your workout.

Choose Your Workout Focus

Switch from moving to stationary handlebars and change your workout from a total body workout to a lower body focus.

Customizable Display

Customize the capacitive touch display to show the data most important to you. USB port charges your mobile device. The on-screen music volume and play controls and console headphone jack are more secure than resting your music player on the console.

Preva® Integration

Your workout data can be automatically uploaded to the Preva mobile app making it easy to track your goals and achievements.

Lever style Motion Controls

Just like the Precor models in health clubs, lever style controls for CrossRamp® elevation and resistance are responsive, intuitive and easy to use while on the elliptical.

Heart Rate Monitoring

Maximize your workout results with touch sensor and wireless heart rate monitoring*. Works with any Polar® compatible wireless heart rate transmitter (included with purchase).

SPECIFICATIONS

CrossRamp® Movement:	Motorized variable
CrossRamp® Elevation Range:	15° - 40°
Handlebars:	Convertible from Moving to Stationary
