

# TRM 211 TREADMILL

Looking for fitness equipment that feels great, is reliable, lasts for years and keeps you engaged? The new Energy™ Series Treadmills provide a fitness center quality workout in the convenience of your home. With technology adapted from our commercial-grade models, these treadmills have design and convenience features that will help you reach your fitness goals faster and enjoy your workouts more.

# TRM 211 TREADMILL

## HIGHLIGHTS

### Energy Stride™ Technology

Energy Stride™ Technology uses the patented deck mounting system from our commercial treadmills to reduce stress on your joints by giving areas of the deck optimal amounts of underfoot cushioning and rigidity for the most comfort throughout your stride.

### Structurally Sound Design

The non-folding design provides a more structurally sound and stable platform than folding types. Mechanical and electrical components are designed and tested for years of reliability and trouble free operation.

### Preset Workouts and Easy-to-Use Console

Get moving fast with our easy-to-use console. Use Quick Start or preset workouts. The streamline design eliminates non-essential buttons and gimmicks. The controls you need for a great workout are easy to see and use.

### 3 HP Motor and No Maintenance Design

Powerful 3 HP continuous duty motor runs cool and quiet providing plenty of power and torque when you want it--such as during interval training when you need to speed up and slow down in a hurry. 100% no maintenance design means you won't need periodic service calls.

### Heart Rate Monitoring

Add to your workout data with touch sensor and wireless heart rate monitoring\*. Works with any Polar® compatible wireless heart rate transmitter (sold separately).

### SmartRate® Target Heart Zone

When age and weight are entered, SmartRate displays when the exerciser's heart rate is in the fat burn, cardio or peak target zone.\*

\* The heart rate and SmartRate® features are intended for reference only. They may not be accurate for every user or at every intensity and are not intended for use as a medical device.

## SPECIFICATIONS
