# ALPINE RUNNER

HIGH INTENSITY TRAINING

30% INCLINE

-3% DECLINE

## CLIMB TO NEW HEIGHTS

Studies show that exercising on a treadmill at an incline burns more calories for both walkers and runners. The TRUE Alpine Runner is the ultimate in incline training with an incline range of -3% to 30%, intensifying workouts like never before. Users can choose from a variety of programmed workouts including TRUE's new Monument Workouts which allow the user to climb the heights of internationally famous landmarks like the St. Louis Arch, Eiffel Tower, Mount Everest and more. These features combined with a patent-pending incline system engineered to reduce the load on the incline motor, and thus reduce wear and tear, make the Alpine Runner a win in the busiest commercial facilities.
