Since 2009 Tuff Stuff Fitness has been the exclusive Youth Fitness Equipment supplier to the prestigious National Foundation of Governor's Fitness Council Awards Program and for the California Governor's Challenge Programs. Our KDS Youth Fitness Circuit is uniquely designed and modified to work with users who are typically 4'6" through 6'0" height. KDS weight stack units come standard with Color Coded Safety Stacks, and blended lighter weight stack increments to allow younger and deconditioned youth to work comfortably but also accommodate stronger and bigger youth athletes as well. Also a noise reduction kit using rubber spacers is included standard with all KDS Weight Stack Units minimizing noise issues to nearby classrooms, work areas or other noise sensitive areas. Optional Upgrade Heavier Weight Stack Kits are also available.

TuffStuff's KDS Circuit is an ideal line for traditional timed circuit training programs, "Pod" or Body Part training, sport specific training and many other applications. Depending on room size and supervision levels, and trainers or coaches preference...units can be set up as single unit alternating stations, pairs, triplets or larger groupings to customize program needs.
