## HIGHLIGHTS

### CrossRamp® Technology

Precor CrossRamp technology adjusts the shape of the elliptical path your feet travel so you can target specific muscles or all major lower body muscle groups.

### Proper Biomechanics and Variable Stride Geometry™

Our patented elliptical path perfectly mimics a natural running stride allowing exercisers to keep their heels down through all ranges of motion for a more comfortable, effective and ergonomically correct workout.

### Preset Workouts

25 preset workouts help you tailor your exercise to your fitness goals and stay challenged. Built-in Work Out Accelerators suggest ways to get more out of your workout.

### Choose Your Workout Focus

Switch from moving to stationary handlebars and change your workout from a total body workout to a lower body focus.

### Customizable Display

Customize the capacitive touch display to show the data most important to you. USB port charges your mobile device. The on-screen music volume and play controls and console headphone jack are more secure than resting your music player on the console.

### Lever style Motion Controls

Just like the Precor models in health clubs, lever style controls for CrossRamp® elevation and resistance are responsive, intuitive and easy to use while on the elliptical.

### Heart Rate Monitoring

Maximize your workout results with touch sensor and wireless heart rate monitoring\*. Works with any Polar® compatible wireless heart rate transmitter (included with purchase).

## SPECIFICATIONS

### CrossRamp® Movement:

Motorized variable

### CrossRamp® Elevation Range:

15° - 40°

### Handlebars:

Convertible from Moving to Stationary
